CANADIAN FERTILIZER QUALITY ASSURANCE PROGRAM

The Canadian Fertilizer Quality Assurance Program (CFQAP) is a national quality control program that has been designed by Agriculture Canada. Each fertilizer manufacturer identified as a participant in this publication has implemented this voluntary program in their own plant. Agriculture Canada recognizes the efforts and commitment of these companies to manufacturing high quality fertilizers.

1990 was the first year that manufacturers had an opportunity to participate in the CFQAP. The plant ratings* reported here are based on the first samples taken under this program. In addition to the samples taken by the companies, Agriculture Canada inspectors took samples from many of these companies. These sample results have been combined with the company sample results to give the plant rating. As with any new program, it would be prudent not to judge individual performance on only one year's results. On an industry wide basis it compares favorably with past performances.

Over the next few years, as the program is being phased in and a greater number of fertilizer blenders participate, this report will more truly reflect the performance of the Canadian Fertilizer industry as a whole.

This report is divided into 2 main sections. These are:

1) Ratings for materials (basic ingredients used to manufacture blends).

2) Ratings for blends.

These 2 main sections are further divided as follows:

a) Members in the CFQAP. These ratings are based on a combination of Company and Agriculture Canada results. Those companies that have submitted samples are participants in the CFQAP.

b) Non-members in the CFQAP. These ratings are based on Agriculture Canada results only.

*(See Page iii for a description of the Rating System.)

Programme canadien de vérification de la qualité des engrais

Le Programme canadien de vérification de la qualité des engrais (PCVQE) est un programme national mis sur pied par Agriculture Canada. Chaque fabricant d'engrais qui participe à ce programme a déjà établi ses critères dans son propre établissement. Agriculture Canada reconnaît les efforts que déploient ces compagnies pour produire des engrais de qualité supérieure.

C'est en 1990 que les fabricants d'engrais ont eu la possibilité pour la première fois de participer au PCVQE. Les notations * obtenues par les différentes compagnies sont basées sur les premiers échantillons prélevés dans le cadre de ce programme. Les échantillons ont été prélevés par les compagnies participantes et par les inspecteurs d'Agriculture Canada. Les résultats obtenus par les deux groupes (compagnies et Agriculture Canada) ont été regroupés pour donner une notation globale de l'établissement. Comme pour tout nouveau programme, il serait prudent de ne pas juger les performances individuelles sur les résultats d'une seule année. Basé sur l'ensemble de l'industrie, ils se comparent favorablement aux performances antérieures.

Au cours des prochaines années, au fur et à mesure que le programme est appliqué et qu'un plus grand nombre de fabricants d'engrais s'y inscrivent, ce rapport reflétera plus fidèlement la performance de l'industrie canadienne des engrais.

Ce rapport est divisé en 2 sections :

1) Notation pour les engrais de base (ingrédients de base utilisés dans la production des mélanges).

2) Notation pour les mélanges.

Ces deux sections se subdivisent comme suit :

1) Membres du PCVQE. Les notations sont obtenues en combinant les résultats des échantillons prélevés par la compagnie même et par Agriculture Canada. Les compagnies qui ont fourni des échantillons participent au PCVQE.

2) Non-membres du PCVQE. Les notations sont basées sur les résultats des échantillons prélevés par Agriculture Canada seulement.

* (Voir page iv pour une description du système de notation.)

RATING SYSTEM

The results for each location which has sample results are summarized according to a plant rating system consisting of the following categories: AAA, AA, A, B, C and F.

Blended Fertilizers

Individual plant ratings of blended material are based on the commercial value (measured by the Combined Nutrient Level (CNL)) and the plant nutrient ratio (measured by the Ratio Compliance Index (RCI)). The product of these two factors is known as the Quality Control Index (QCI) and the average is used to determine the plant's standing.

Plant Rating Intervals

The Plant Rating Intervals for the QCI are as follows:

Ratings	QCI Range
AAA	100.0 - 99.51
AA	99.5 - 98.51
A	98.5 - 96.51
B	96.5 - 92.51
C	92.5 - 84.51
F	< 84.50

Fertilizer Materials

Fertilizer materials are assessed according to current analytical tolerances. Individual samples are designated as being in compliance if the results of analysis do not exceed the tolerances which accommodate unavoidable variation associated with sampling and analysis.

Plant Rating:	
AAA	95.1% or more of samples in compliance
AA	85.1-95% of samples in compliance
A	75.1-85% of samples in compliance
B	65.1-75% of samples in compliance
C	50.1-65% of samples in compliance
F	less than 50% of samples in compliance

SYSTÈME DE NOTATION

Les résultats pour chaque établissement sont publiés selon un système de notation utilisant les catégories suivantes : AAA, AA, A, B, C, et F.

Engrais mélangés

Le système de notation pour chaque établissement manipulant des engrais mélangés est basé sur la valeur commerciale de l'engrais (mesurée par le principe nutritif combiné (CNL) et le rapport entre les éléments nutritifs (mesuré par l'indice de conformité au rapport nutritif (RCI)). Le produit de ces deux facteurs est connu comme l'indice de contrôle de la qualité (QCI) et la moyenne des résultats obtenus sert à déterminer la note de l'établissement.

Intervalles du système de notation :

Les intervalles du système de notation pour le QCI sont :

Notation	Intervalles
AAA	100,0 - 99,51
AA	99,5 - 98,51
A	98,5 - 96,51
B	96,5 - 92,51
C	92,5 - 84,51
F	< 84,50

Engrais de base

Les résultats d'analyse pour les ingrédient simples sont évalués selon les tolérances analytiques. Les échantillons seront conformes si les résultats (en tenant compte des variations inévitables associées à l'échantillonnage et à l'analyse) ne dépassent pas les tolérances permises.

Système d'évaluation :

AAA	Conformité de 95,1 % et plus des échantillons
AA	Conformité de 85,1 à 95 % des échantillons
A	Conformité de 75,1 à 85 % des échantillons
B	Conformité de 65,1 à 75 % des échantilons
C	Conformité de 50,1 à 65 % des échantillons
F	Conformité de 50,1 % et moins des échantillons
